

Have a shelter need that requires special engineering? ShelterLogic engineers will design and manufacture customized all-weather structures up to 72' x 120' to meet whatever need you have. Visit us at shelterlogic.com or call 800.397.0192 for more info on Engineered Structures.

Heavy Duty Steel Frame

Triple-coated galvanized steel frame with crossrails ensures frame integrity and superior stability in all directions.

Steel Plate Connections

Ultra strong connections add to the durability and stability of ShelterLogic Engineered Structures.

Durable Cover Materials

Three high-quality cover choices means your building will fit your exact needs. And your budget.

Torque Winch Tightening System

Our Torque Winch allows precise PSI control of the cover tension and keeps it where it needs to be.
